# Web Advance: JavaScript

PGTE: 5505 | Section E | CRN: 6455

Instructor: Karla Polo

Week 1: Introduction to JavaScript

---

---

# Today's Menu

Get to know you.

Let's talk about the Syllabus.

Github class repo.

Refresh your memory with some coding.

---

---

# Who am I?

<https://kaypolo.github.io/portfolio/>

---

---

# Who are you?

Are you registered or are you on the waiting list?

Name?

MFA 1st / 2nd year? BFA?

On a scale of 1-10, how good are you at web?

What do you hope to learn in this class?

Hobbies? I won't judge!

# WHY CODING?

---

---

# Why Coding?

Age of Specialization.

Many available tools to generate code.

Coding is difficult to master.

## But ...

Better understanding of the process needed to build.

Better control in defining execution params.

Create better and more efficient designs.

---

## HTML

structure

## CSS

presentation/appearance

## JavaScript

dynamism/action

---

# What is JS?

- Is a Programming Language
- Runs in your browser, not in a server like most programming languages.
- Provides Interactivity
- Provides real-time content updates
- Enables animations
- Allows for many approaches to Design Patterns
- Frameworks: Angular, Vue, Ionic..
- Libraries: React, jQuery, D3, Three, P5...

---

\* Java & Javascript are not related. They are two different programming languages.

---

# What Can Javascript do?

Generative:

<http://color-wander.surge.sh/>

Practical:

<https://codepen.io/TheVVaFFle/project/editor/ZRbWaG#0>

<https://codepen.io/giana/pen/GJMBEv>

Informative

---

# Let's Refresh

---

---

# HTML

- Semantic HTML tags
- Newer HTML5 tags: <section> <header>  
<nav> <footer> <article>, etc
- Including CSS
- Including JS
- Importing custom fonts and other assets

# CSS

- Inline, Internal, External Styles
  - Basic CSS Selectors
  - Values & units (px, %, em, rem)
  - Basic web color principles (RGB, RGBA, hexadecimal color, HSL)
  - CSS Layout (The Box Model)
  - CSS Positioning
  - Floats and clearfixes
  - New CSS Features (box-shadow, text-shadow, etc)
  - Responsive CSS with media queries
-

---

# JS: Back to Basics

- JS definitions
  - Variable and Data types
  - Arrays vs Objects
  - Iteration
  - Conditionals
  - Functions: Declarations and Expressions
  - Scopes and Closures
  - Timing functions
-

---

# Let's Code

---

---

# HW

## 1. Codecademy: Introduction to JavaScript

<https://www.codecademy.com/learn/introduction-to-javascript>

**Mandatory:** Complete lessons 1-3 (Only those sections that are free)  
Submit the higher badge you get to Canvas. If you have already done these lessons in the past, complete from 4-6.

**Bonus:** Try to go as far as you can, this is going to help you to create a solid foundation for the Web Advanced class.

---

---

# HW

## 2. Midterm Project

Define what project you are going to be developing during the semester from now until you midterm presentation. Submit your concept and rough ideas to Canvas

---
